

USAMA SHAHNAWAZ *DevOps Engineer*

shahnawazusama@gmail.com • 03110653141 • Pakistan, Lahore • github.com/codeisgoo

Summary

DevOps Engineer with hands-on experience owning CI/CD pipelines, AWS cloud infrastructure, and production observability across multi-service environments. Focused on cutting release cycle times, reducing cloud costs, and embedding security at every stage of delivery. Track record of removing blockers, mentoring engineers, and automating operational pain points. AWS Certified Cloud Practitioner with hands-on AWS and GCP experience.

Experience

01/2024 - Present
Brampton, Canada
(Remote)

DevOps Engineer

TRIOTECH SYSTEMS

- Partnered with agile delivery teams to remove blockers, create Jira tickets from stakeholder requirements, and drive on-time deployments across 5+ production services.
- Built and owned CI/CD pipelines (Jenkins, GitHub Actions, AWS CodePipeline, CodeMagic), cutting average deployment time by ~40% and eliminating 3-4 hours of manual release effort per sprint.
- Managed infrastructure as code with Terraform and Ansible across AWS and GCP, covering 5+ environments, version-controlled configs reduced environment drift incidents to near-zero.
- Owned the observability stack (Prometheus, Grafana, CloudWatch), cutting MTTR by ~30% via automated alerting and post-incident write-ups.
- Embedded security via Snyk, Cloudflare WAF, and IAM hardening, remediating 100+ critical/high findings across services within 60 days.
- Containerised workloads with Docker and AWS ECS, managing image builds, task definitions, and service deployments across production.
- Managed ECS cluster scaling to handle 3x traffic spikes without downtime, working with engineers on deployment and production readiness.
- Worked with Kubernetes (K8s) on container orchestration basics including pod deployments, service configs, and IAM and logging best practices.
- Deployed cross-cloud workloads on GCP (Firebase Hosting, Cloud IAM, Cloud Storage), supporting 2 client projects on a hybrid AWS/GCP stack.
- Authored and maintained runbooks, deployment docs, and post-incident write-ups now used daily by a 6-person engineering team.
- Mentored 2 junior engineers on pipeline design, Linux admin, and DevOps practices, reducing their ramp time by ~50%.
- Automated repetitive ops with Python and Bash scripts, saving 5+ hours/week across patching, config management, and health checks.

08/2023 - 11/2023
Lahore, Pakistan

Trainee DevOps Engineer

TechnoDice

- Built CI/CD pipelines using Jenkins and GitHub Actions, gaining hands-on experience with Terraform and Ansible for infrastructure automation and configuration management.
- Deployed and configured applications on AWS (ECS, Kubernetes), applying security best practices including IAM policies and logging for production diagnostics.
- Documented deployment processes, runbooks, and configurations, collaborating with development and operations teams to troubleshoot production issues.

03/2023 - 06/2023
Lahore, Pakistan

Software Engineer Intern
Infinikorn

- Contributed to full-stack projects using Ruby on Rails, managed version control with GitHub and worked across PostgreSQL, MySQL, and SQL Server databases.

Education

2018 - 2022
Bahawalpur, Pakistan

B.S. Computer System Engineering
Islamia University of Bahawalpur

SKILLS

Programming Skills

JavaScript, Python, Bash/Shell, Ruby

Databases & Cloud Services

MySQL, MongoDB, Redis, PostgreSQL

Tools

Docker, Kubernetes, Ansible, Linux, Terraform, CI/CD, Git, GitHub, CodeMagic, Snky, Jenkins, Prometheus, Grafana, Cloudflare, GitLab

AWS

EC2, CodePipeline, VPC, ELB, ECS, ECR, EBS, S3, CloudFront, IAM, Lambda, PinPoint, SNS, CloudWatch, DeviceFarm

Security & Compliance

Snyk, Cloudflare WAF, IAM Policies, Secrets Management, Vulnerability Remediation

GCP

Firebase Hosting, Google Cloud IAM, Google Cloud Storage

CI/CD & Pipelines

GitHub Actions, Jenkins, AWS CodePipeline, CodeMagic, GitLab CI

Others

WordPress DNS Migration, GHL Agents, Google Console, Apple Developer Account

Strengths

Communication

Collaborative and clear communicator, comfortable working embedded within cross-functional agile teams and interfacing with international development teams.

Continuous Learning

Completed 8+ full-scale courses while working full-time to earn the AWS Cloud Practitioner certification; actively expanding skills across multi-cloud and security domains.
